

Spydar

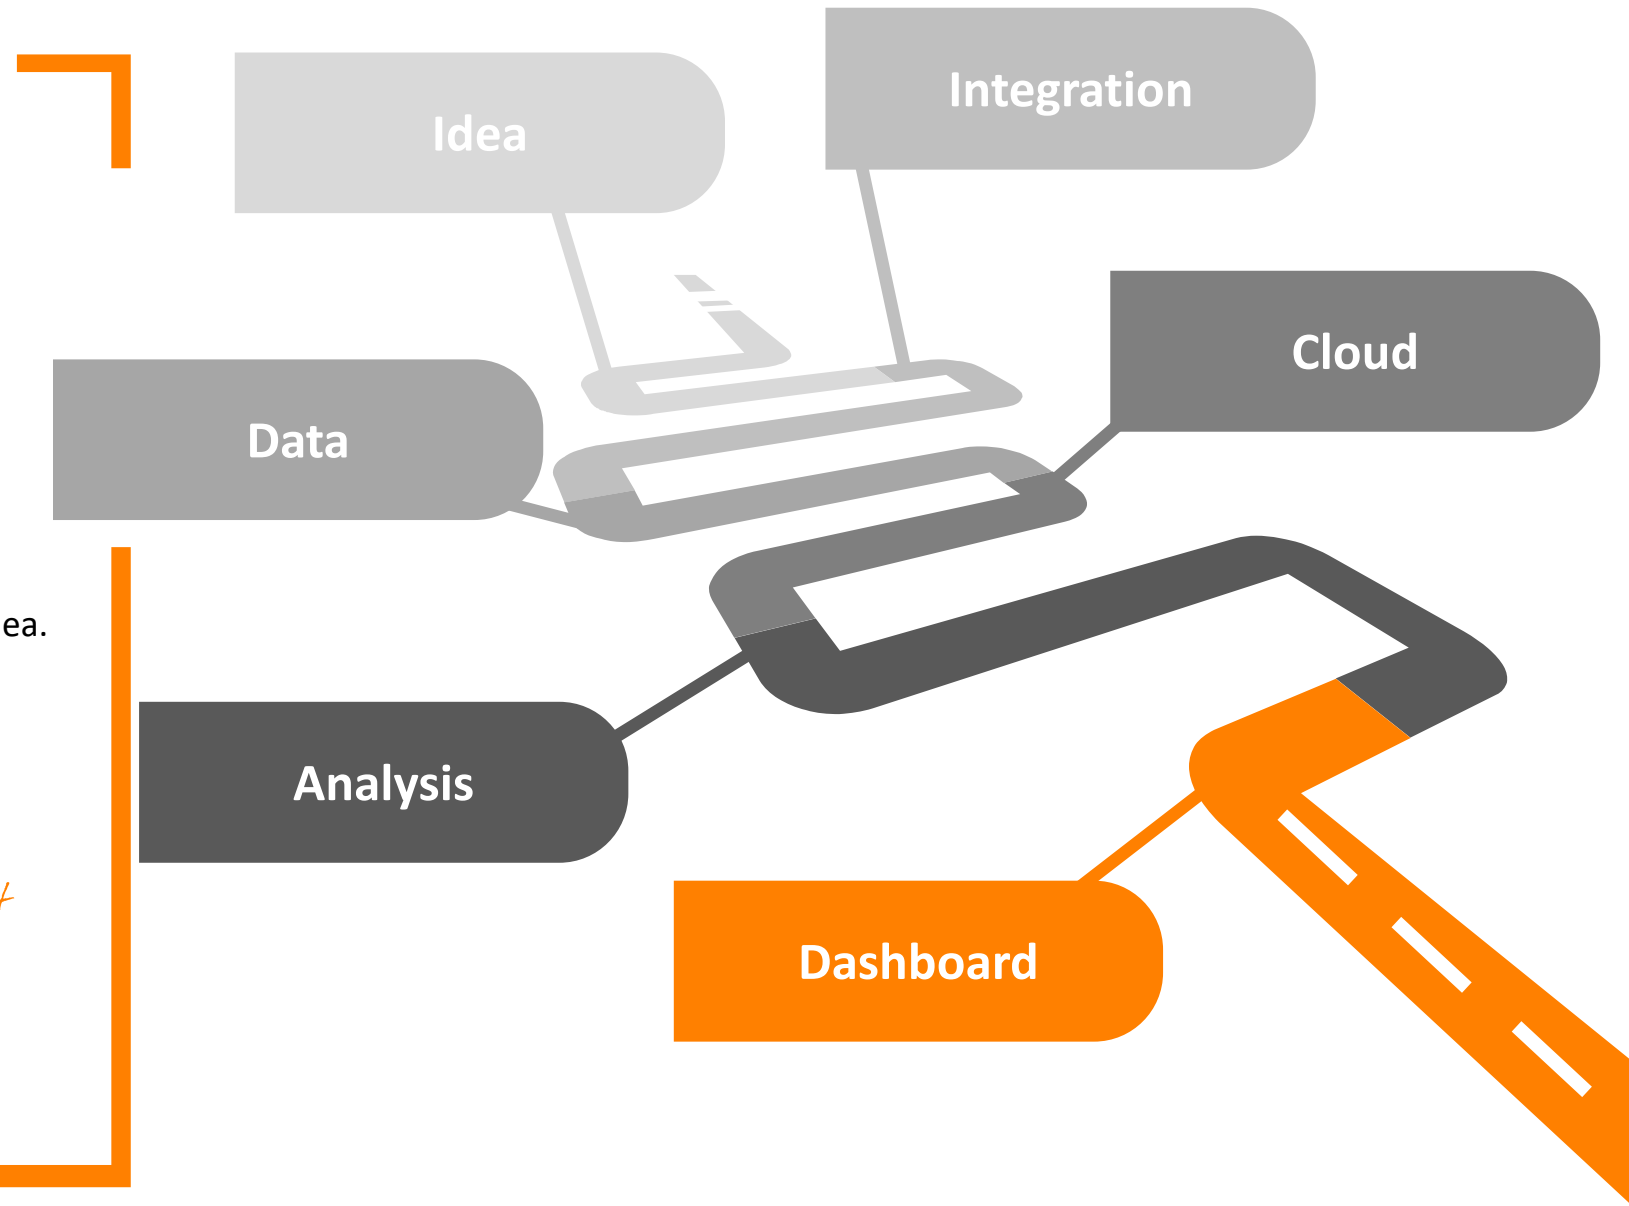

IoT solutions with a twist

What we do?

We help you to enable your IoT or Industry 4.0 idea. With support, products and system integration. So that your company can develop their most profitable Solutions.

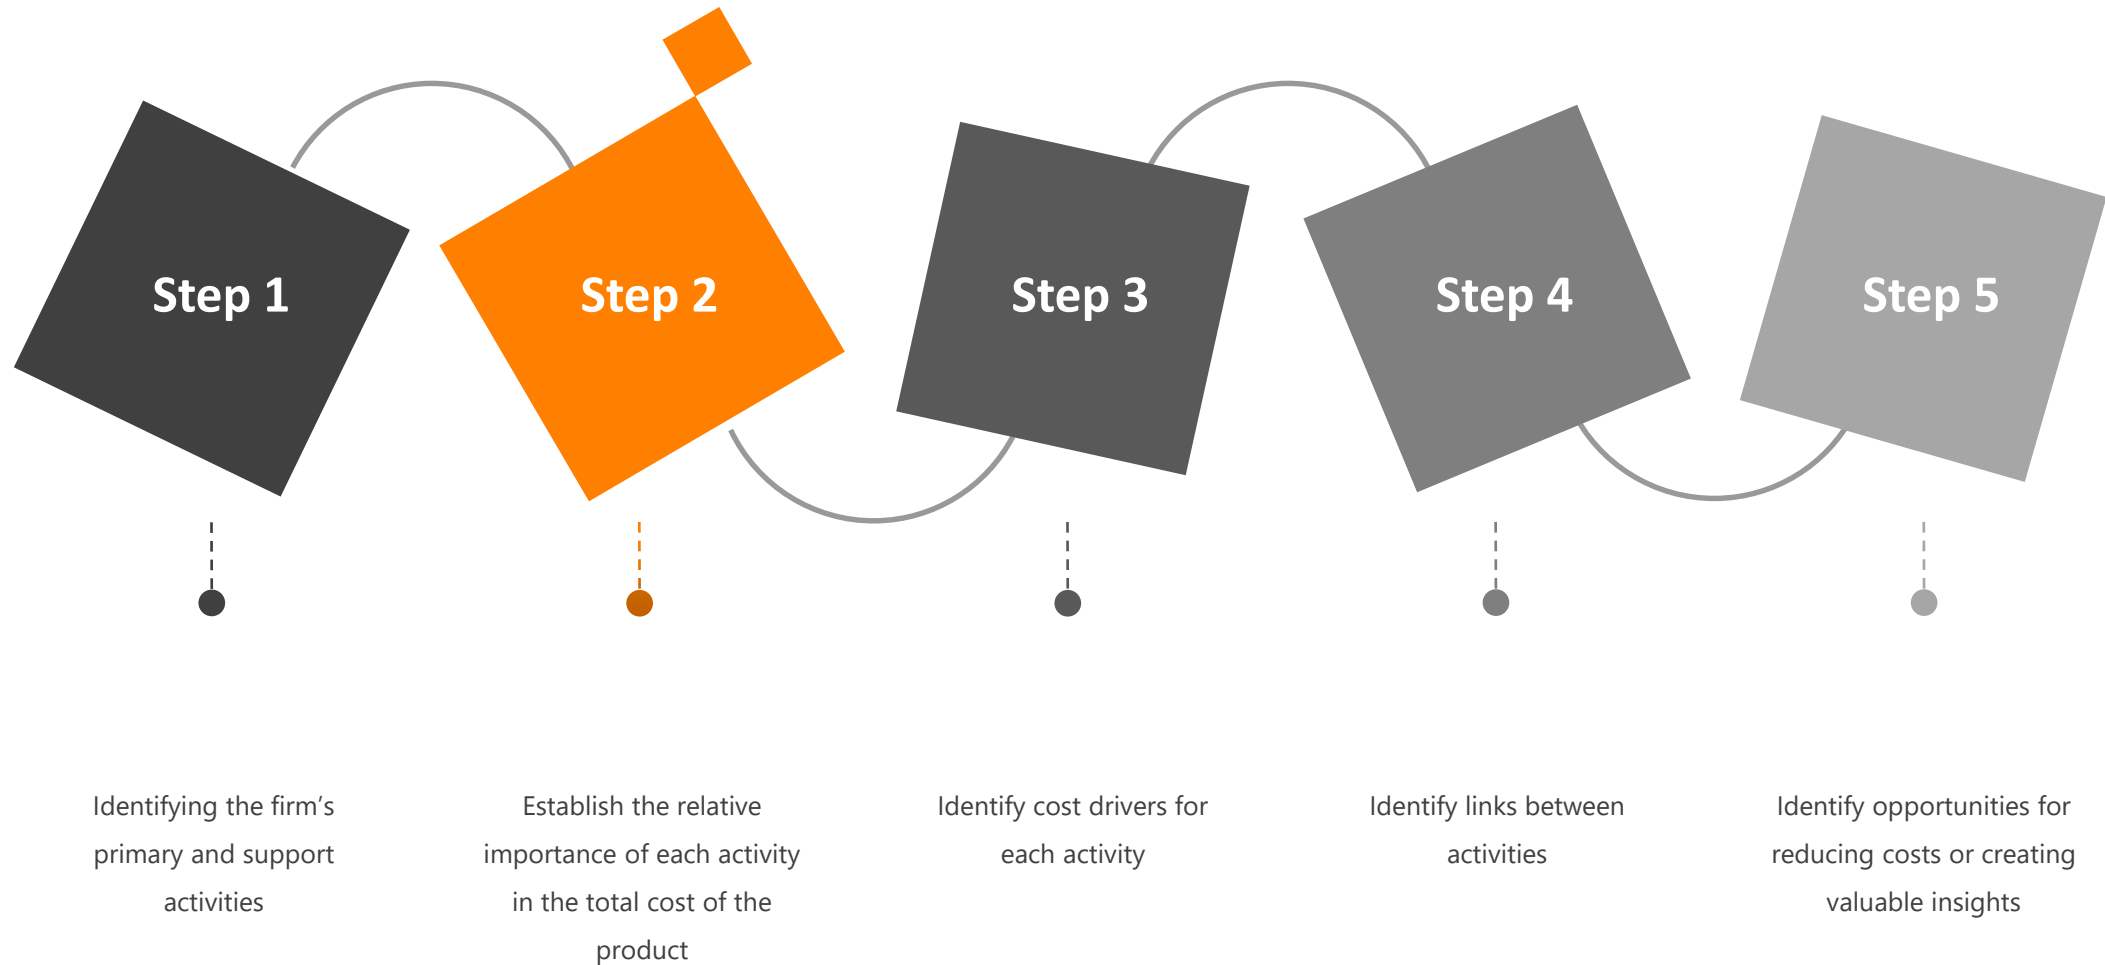

IoT solutions with a twist

We help you from Idea till Dashboard as a service

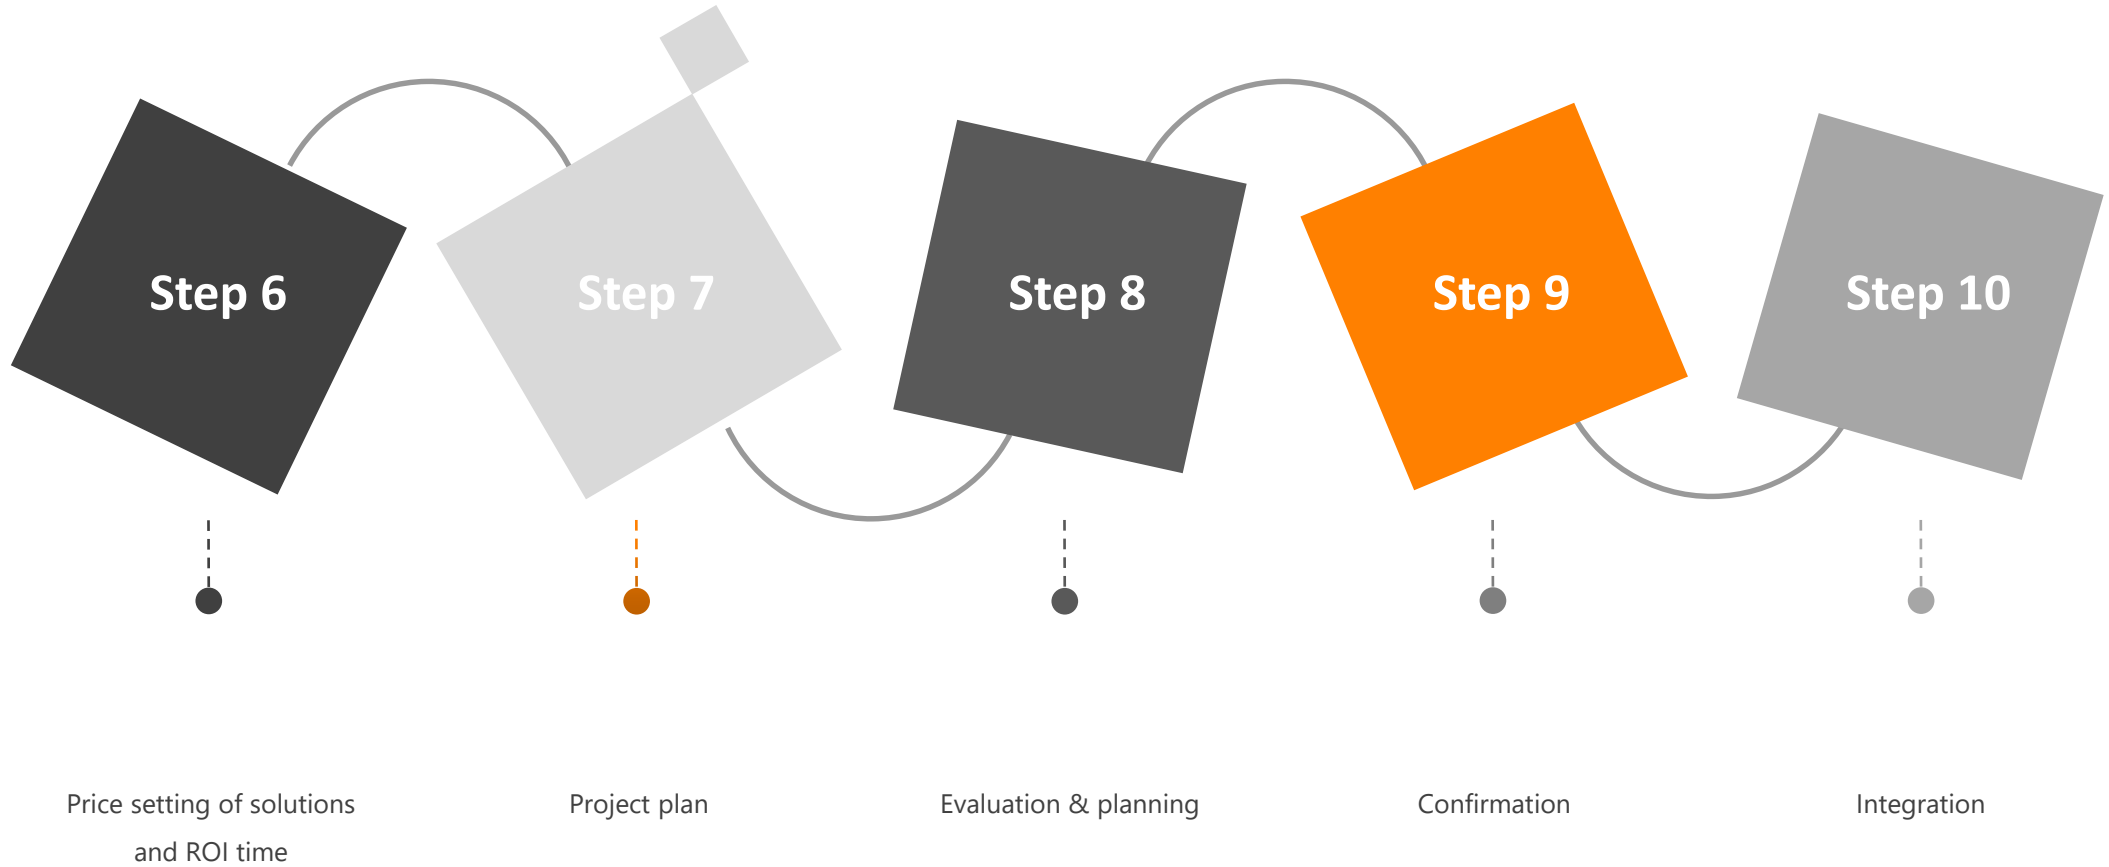

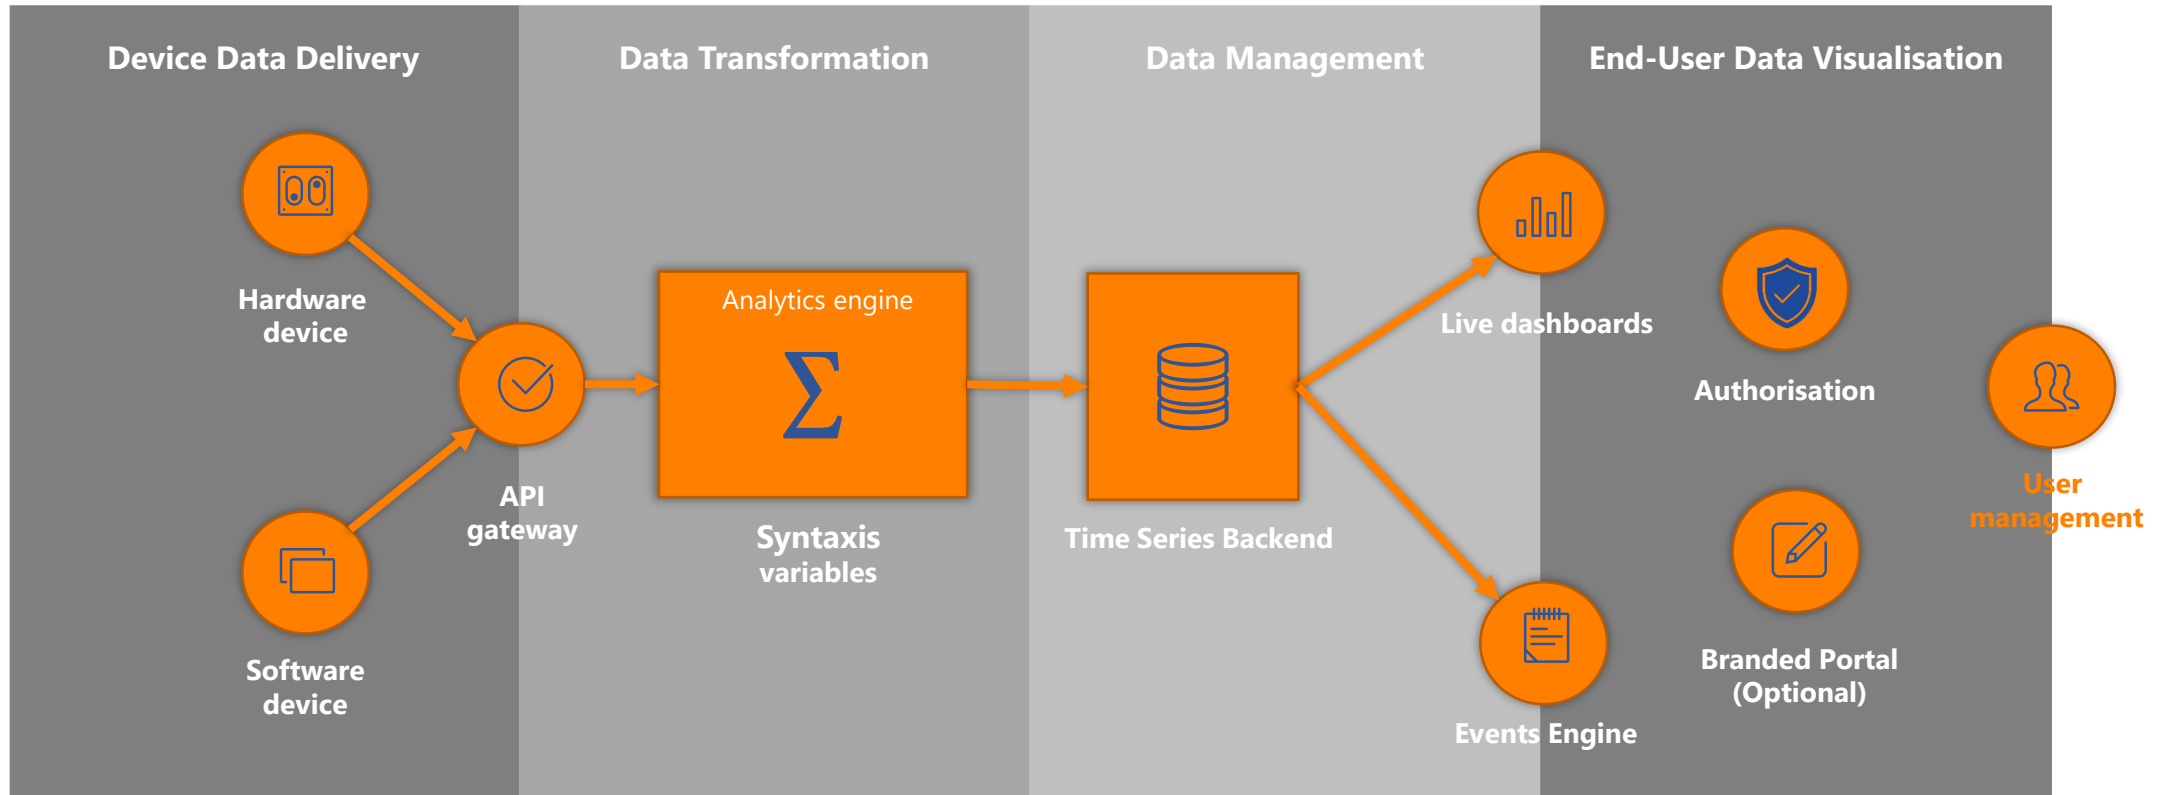

Our Value chain analysis and integration

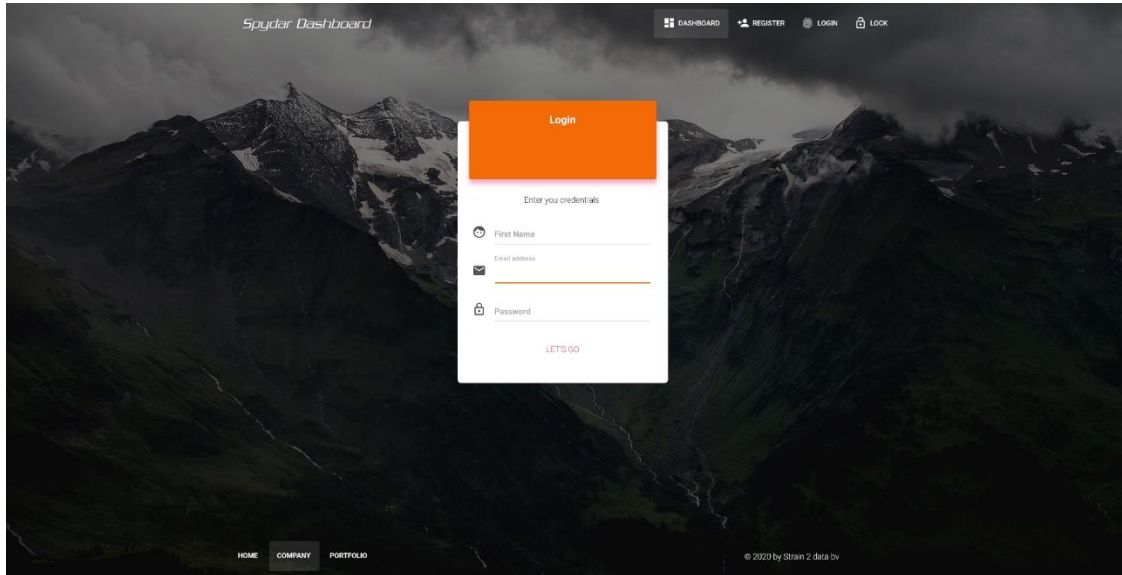

Our Value chain analysis and integration

Data process flow from input to valuable insights

Dashboard

We also offer an easy dashboard that you can use to get started. Whether your data is needed every day or every second, Spydar time-series infrastructure is optimized to receive, compute, and return millions of data points each second across the globe. And with up to 3 years rolling data retention standard, Spydar Cloud gives integrators and innovators a place to store and mine data for added insights and analytic overlays like anomaly detection or predictive maintenance.

Where are we active

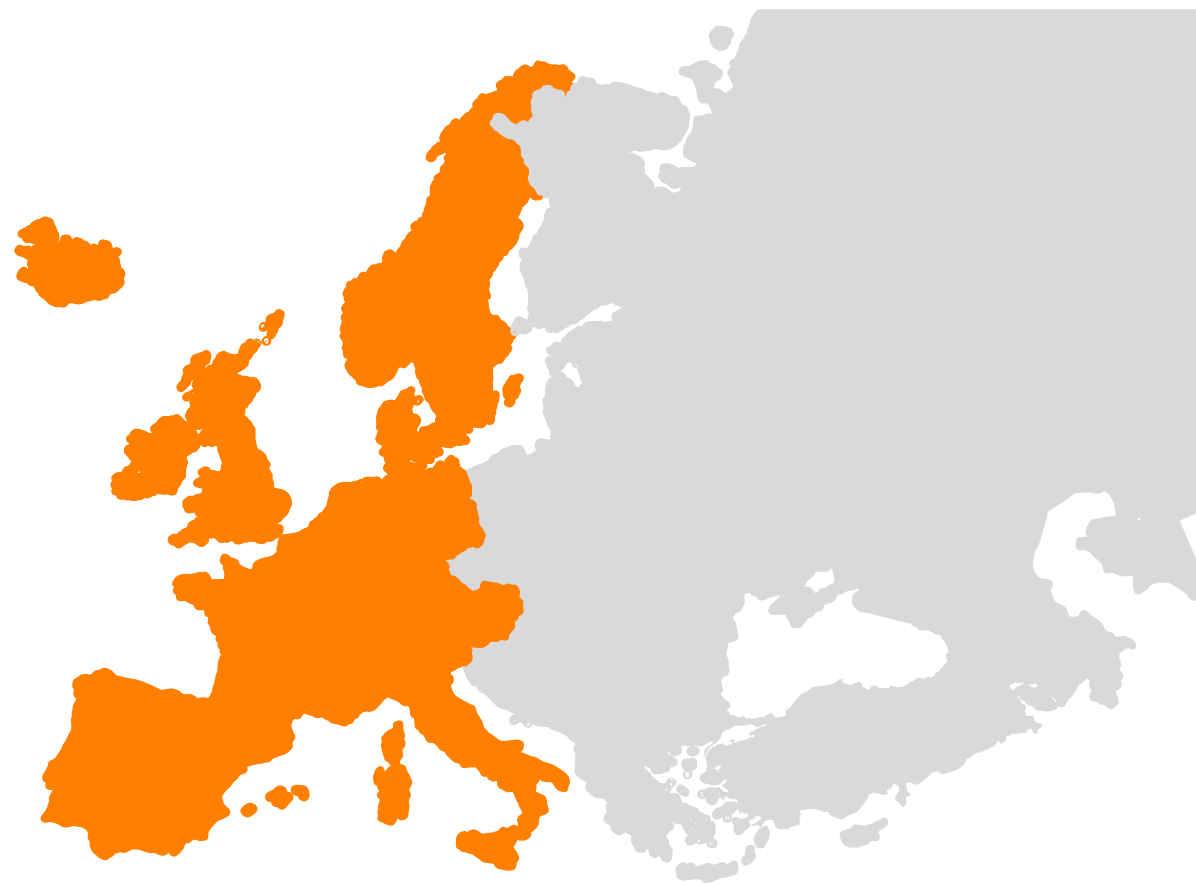

Our solutions are mainly located in West-Europe.

We operate in all countries within Western-Europe
